North America's Complete Lighting Solution

Some “Light” History

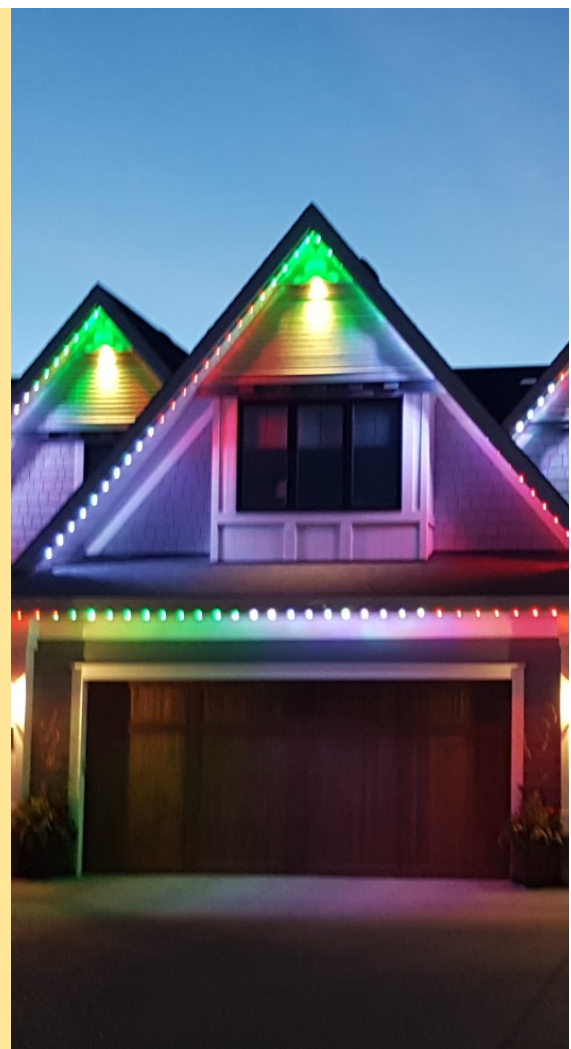

THE STORY

Long ago, in a time called the 80s, some brothers in Utah were installing regular holiday lighting as part of their landscaping business.

15 years ago, they started offering a permanent holiday lighting solution, to clients, as an upgrade and within a few years they expanded to California.

The brother in charge of California, grew up with the founders of GlowStone Lighting, in Canada. In 2014, he reached out to them about selling permanent holiday lighting in Canada and as they say...

... the rest is history.

GlowStone Today

Since 2014, the GlowStone Lighting system has changed for the better. The lights that they used in Utah & California weren't prepared for the BIG temperature & humidity changes we go through in Canada.

Now, our lights are specially manufactured with the Canada's extreme temperature, & humidity changes in mind.

We have developed both a “Standard” Series, to compete with other lighting products and a “Premium” Series that outshines and outlasts every competitor's lights on the market.

CREATE | CONTROL | COMMAND

Architectural Lighting – Pot Lights

Holiday Lighting — Easter

GlowStone “Standard” Lighting

A competitively priced lighting system that rates higher than our competitors in every category.

The Features of our “Standard” lighting System

A Capped back.

This cap limits the damages of extreme weather & humidity by protecting the silicone waterproofing gel in each light.

Waterproof Rated IP67 & Low Temperature Rated -20°C.

Can be Submerged in Water up to 1 meter and -20°C is the common rating for most outdoor electronics

A String of 20 lights.

By using a string of 20 lights we limit the number of fail points the Manufacturer connectors add to your system.

No “Added” Connectors.

We Solders & Heat Shrinks our connections together but... there are Manufacturer connectors every 20 lights.

GlowStone “Premium” Lighting

Our “Premium” light, is the highest quality light on the market.

It’s the only light in North America with...

Waterproof Rating of IP68 & Temperature Rated to -55°C

Frozen in a Block of Ice or even Submerged in Boiling Water, our lights work perfectly.

Fireproof Rating of V-0.

Our lights won’t start a fire OR sustain a flame. Even under a direct flame they will NOT drip anything flammable.

No Manufacturer Connectors.

We Solder & Heat Shrink all of our connections together because, Manufacturer connectors, are only rated to last 2 - 5 years. While our soldered connections are rated to last for 20 years.

Highest Quality Lights & Highest Quality Install
That’s the GlowStone Lighting Difference

Architectural Lighting – Warm White

Holiday Lighting—Christmas

We Stand Behind Our Lights

OUR 30-DAY GUARANTEE:

If, within the first 30 days after install, you don't love your lights, we will remove the entire system and we'll refund you 100% of your money.

Ask about our “Limited lifetime” Warranty upgrade

The Highest Standards

Our GlowStone “Premium” Lights are manufactured to a higher standard than any other RGB Light on the market. No competitors light has a higher Waterproof Rating (IP68), or a higher Fireproof Rating (V-0) or better Low Temperature rating (-55°C).

Architectural Lighting

Safe &
Secure

Use our Architectural lighting effects to make you home safer and more secure. Use a pot lights effect or an accent colour to make your home more inviting to friends but less inviting to any criminal elements passing by at night.
